
Meetings for the creation of consortium and collaborations in relation to IFMIF DONES Challenges.

Participants may request a space in one of the rooms designated during the Forum for coordination or networking meetings regarding potential projects. The intention is for the applicant to express interest in presenting, discussing, proposing and/or leading an R&D project, with special relevance to the challenges suggested by IFMIF DONES.

Given that the number of rooms is limited, the allocation of spaces will be carried out by a technical committee. Priority will be given to the order of requests provided that the committee considers that the proposal is relevant in relation to the themes of the II I+DONES FORUM.

From the organization, we will be as flexible as possible to try to accommodate all demands within the physical limitations of space and time duration of the day.

Four rooms will be available continuously from 4:00 p.m. to 9:00 p.m.

The space applicant will have to answer the following questions:

- Challenge proposed
- Presentation of the challenges and needs to be covered
- Profile of companies that you want to address this challenge (profiles, activities, solutions offered)
- Do you need companies located in the region?
- Is there a limitation on the number of companies interested in participating?

Send proposals to info@industryoffice.org

The maximum time of availability of the room will be 120 minutes. It is expected that these meetings will serve as a first contact, and subsequently advance contacts of interest.

In parallel, there will be a B2B meeting area where bilateral meetings can be celebrated, in advance and outside of these rooms. The intention of the rooms is to give a general knowledge of the ideas and future projects and to know the interest in participating of the companies that attend these meetings.

The DEADLINE to submit proposals for these rooms is April 5th. Companies can register for these meetings until April 10th or until capacity is reached.

From that moment on, registered participants will be invited to sign up for those rooms according to the interests indicated by the space applicant and until capacity is reached. Access to the meeting by third parties is subject to approval by the company requesting the space.

* Please keep in mind when selecting attendance that B2B meetings and consortium gestation meetings may overlap.
